# Rowmark®

LaserMax®
Placemat

INSTRUCTIONS

Here we have a cool little project that will add a little color and pizzaz to anything!

We used 1/16" LaserMax® Sky Blue/White for this and it looks great!

1. Import your design and adjust power and speed settings.

2. Insert material into the laser bed. Use the focus tool to adjust to the top of the material. Focusing should be done each with a new material.

3. Tape material to bed to ensure it doesn't move.

4. Run the job file.

5. After it's been cut, give it a once over in the sink with a soft bristle brush to clean it up.

A classy little placemat!
