

Textures

# Serving Tray

## INSTRUCTIONS

*We used 1/8" Royal Blue/White Rowmark Textures material, but you could pick any color that suits your fancy!*

1. Import your design and adjust power and speed settings.
2. Place your blue sheet into your laser bed. Use the focus tool to adjust to the top of the material. Focusing should be done each time a new material is introduced.
3. Run the cut file job
4. Remove the masking from your material and import your engrave file.
5. Run engrave file.
6. Using a strip heat bender you can bend the edges of your serving tray.
