RECYCLING INSIGHTS

WHY ...

As plastic professionals, we need to **take the lead** in dispelling the misinformation

We need to **address the negative public perception** of plastics

It is our **social responsibility** and is in **our own best interest** as industry experts to **reduce solid waste**

Recyclable materials **offer intrinsic value (\$\$)** when separated – **Note: You never see copper wire in a land fill!**

Regulatory issues – It's best to **regulate ourselves** before the government does it for us

FACTS ...

In 2009, approximately **30 million tons** of plastic was **generated** in the United States, but **less than 2 million tons** was **recovered**.

For **every ton** of plastics recycled, we **save 76 million** BTU's of energy ... the equivalent of 3.8 barrels of oil.

Recycling **5 soda bottles** will make enough fiber fill to make **1 ski jacket**. **19 water bottles** will produce enough fiber to make **a large T-shirt** or **1 sq. ft. of carpet**.

Americans use **4 million water bottles an hour** but only 1 in 4 are recycled.

5% of the worlds' population generates over 40% of its waste

Without a resin code on a plastic product, **less than 1%** of the general population can identify one plastic from another.

RECYCLABLE MATERIALS *(cannot be recycled if combined - keep separation 'top of mind')*

HIPS | Acrylic | ABS | Polycarbonate | PETG | PP | PET | HDPE | PP | KYDEX

PROBLEMATIC MATERIALS

Banner Vinyl | Foam Board | Silicone Release Liners | PSA Products | Ink Cartridges
Laminated – Decaled Graphics | Composites (ie: Dibond, Alucobond)

Rowmark materials are considered **“Post Consumer Industrial, Commercial or Institutional”** recyclable materials. Some recycling centers may also consider Rowmark materials as **“Industrial/Pre-consumer”** recyclable materials. **Rowmark encourages you to consult with your regional recycling center for additional information and material qualification.**
