

California Proposition 65 Statement

1/1/2026

For: Rowmark Sheet Products

This statement is provided in response to requests by contractors, designers and end users of Rowmark manufactured sheet materials.

Please note that Rowmark does not routinely analyze for additional substances that are not listed in our SDS documents. Unless otherwise indicated, the information provided is based on information from raw material suppliers, product composition and Rowmark's manufacturing process. Information on any OSHA hazardous components above 1% (by weight) and carcinogens above 0.1% (by weight) is provided in Section 3 of Rowmark's Safety Data Sheets (SDS).

California Proposition 65

Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, was enacted as a ballot initiative in November 1986. The Proposition was intended by its authors to protect California citizens and the State's drinking water sources from chemicals known to cause cancer, birth defects or other reproductive harm, and to inform citizens about exposures to such chemicals.

Rowmark has conducted extensive research to be as diligent as possible with our efforts and have found that a substance of concern in our sheet is styrene. Styrene is a compound that lends strength and durability to our material as such we are currently labeling our products accordingly.

**WARNING:**

This product can expose you to chemicals including styrene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov

The Proposition 65 chemical list can be found at:
