

Safety

Restriction of Hazardous Substances (RoHS)

Rowmark has investigated the Restriction of Hazardous Substances (RoHS 2) directive issued by the European Union (directive 2011/65 EU) through our on-line research.

This RoHS directive prohibits the distribution of products after July 1, 2006 which contain the following materials; lead, mercury, cadmium, hexavalent chromium, poly-brominated biphenyls and poly-brominated diphenyl ethers. The directive appears to apply to all products that operate on electrical power and contain electronic components.

Rowmark complies with the use and disclosure of all halogenated materials and does not incorporate poly-brominated biphenyls or poly-brominated diphenyl ethers in any of its products.

Based on this internal audit, Rowmark plastic sheet products are in compliance with this directive and do not contain any of the elements noted above or in the candidate list in accordance with the referenced directive.

Our related MSDS documents may be found on the Rowmark website. (<http://www.rowmark.com/MARK/MSDS.asp>) and can be referenced for further information.
