

Specialty light diffusing material

Rowmark LD's high impact modified acrylic formulation provides unmatched durability and toughness with long lasting UV resistance. As a custom extruder, Rowmark will manufacture custom sizes and colors to produce the exact product you need!

Features

- *High light diffusion eliminates “hot spots” and amplifies light intensity*
- *Diffused panel provides power to hide LED light source*
- *High impact resistance and long lasting UV protection*
- *If desired, an additional laminated interior film can be applied to easily create reverse engraved text or logos*
