

TPE Products (Thermoplastic Elastomer)

Rowmark runs a variety of custom TPE's designed to give products a soft touch and/or no-slip surfaces. Rowmark can run monolithic sheet, with thicknesses between .020" - .060", in widths up to 25".

This product is primarily run as rollstock. These materials can be run smooth or with one of our pattern rollers (textured or haircell).

Rowmark has the ability to...

- Produce TPE material for gasket and die cut applications
- Color match
- Cut and wind extruded sheet
- Apply pressure sensitive adhesive to extruded sheet
- Extrude and fabricate custom colors
- Extrude a variety of standard resins: Impact Modified Acrylic, HIPS, ABS & more
